
Bullion-Gold data feed

Posted by peterfitz - 2008/05/05 12:48

Hi there

On the 28 April 2008 upon opening Metatrader4 platform, my Bullion-Gold window failed to update. After some time I closed and tried to re-open the window. I then noticed that the Bullion-Gold option was not on the View-Charts dropdown list. I tried closing and re-opening the platform to no avail. I then re-downloaded Metatrader4 platform. This new platform was feeding the data from Metaquotes server. This platform also did not have the Bullion-Gold chart option. Has this data feed been discontinued? What do I do to re-establish this data feed?

Please advise

Thank you for your support

Peter
