Re:FXOPEN

Posted by admin - 2008/02/18 07:22

i have tested fxopen myself.

my testimony

advantage B)

1. no problem withdrawing money from them.

2. u can start with small money (burn your money here.. hehe)

3. fast deposit for e-gold. other deposit option not tested

4. no swap of cause. u can hedge your long GBP/JPY position with other broker here and profit with interest different

disadvantage:(

1. always requote even small price different (1-2pips)against them.

2. order executed if price move against us (most broker practicing this!)slipage.. slipage slipage!!!

3. news trading stay away. sometimes false quote happened

4. not regulated by trusted regulatory body. if something unexpected happened, dont know where to highlight

overall

1. fair broker.

2. not bad enuff to be categorize as a scam broker.

3. suitable for small trader. those with big cap please go to regulated us/uk broker

if you are against my comment pls reply
